Robert,

It turns out that Texas Brine will not be drilling round the clock – they will only be drilling during the daylight hours – about 6AM – 7:30 PM (they will start this afternoon). We have someone scheduled today to perform air monitoring from 8 AM to 4 PM. The LDEQ guy has agreed to stay till 7:30 tonight if your person cannot come in for that short period of time. Next question – would your people like to have the 6AM – 7:30 PM monitoring at the site all together (starting tomorrow)?

Terry
